# The future of entertainment has arrived in Central London

Our fully immersive VR experiences allow up to 6 players to explore a variety of virtual worlds, as if you've stepped into your favourite game or movie.

Using the most advanced VR technology on the planet, groups can see and physically interact with each other, just like in the real world.

Hollywood motion-capture cameras and haptic feedback suits create a completely immersive experience enabling you to touch and feel your way through the game, and truly transport yourself to a new reality.
