The lower ground floor is an entirely flexible space easily set up to host a variety of events or exhibitions. Facilities include two designated meeting rooms all with plug and play AV as well as a choice of projector or wide-screen TV in the main space.

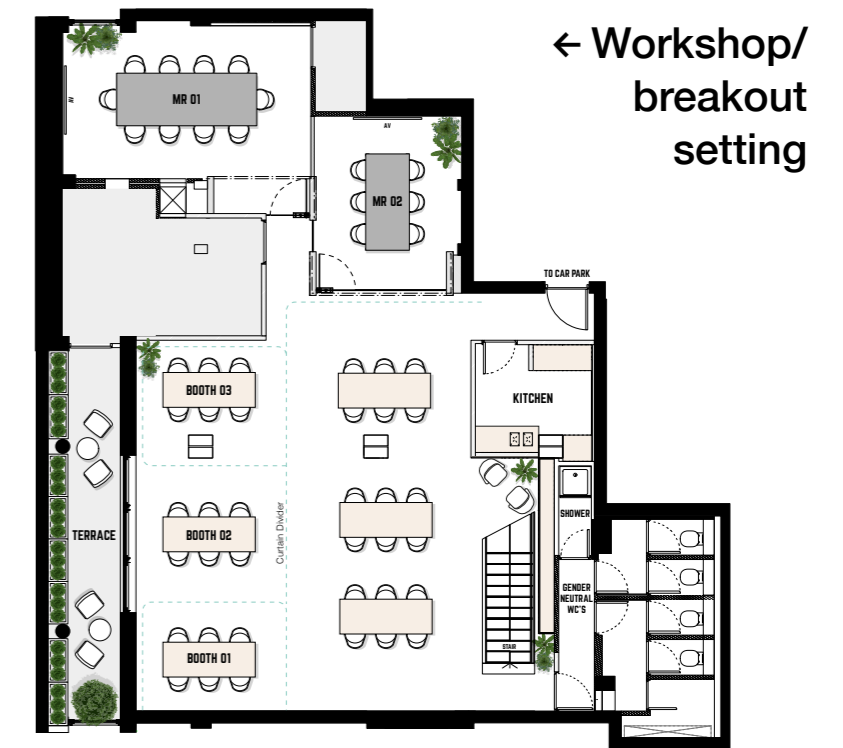

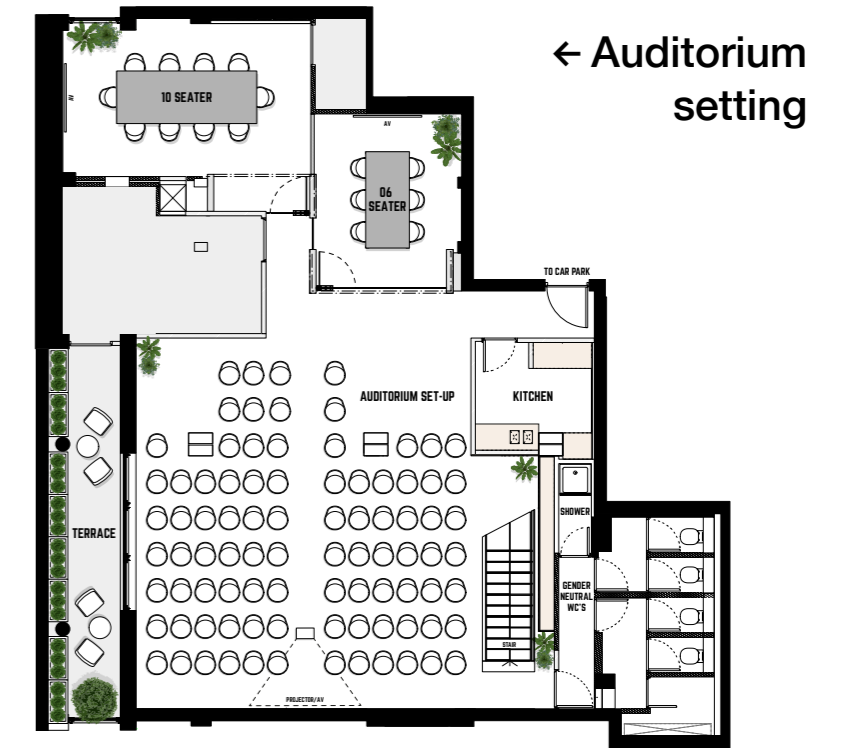

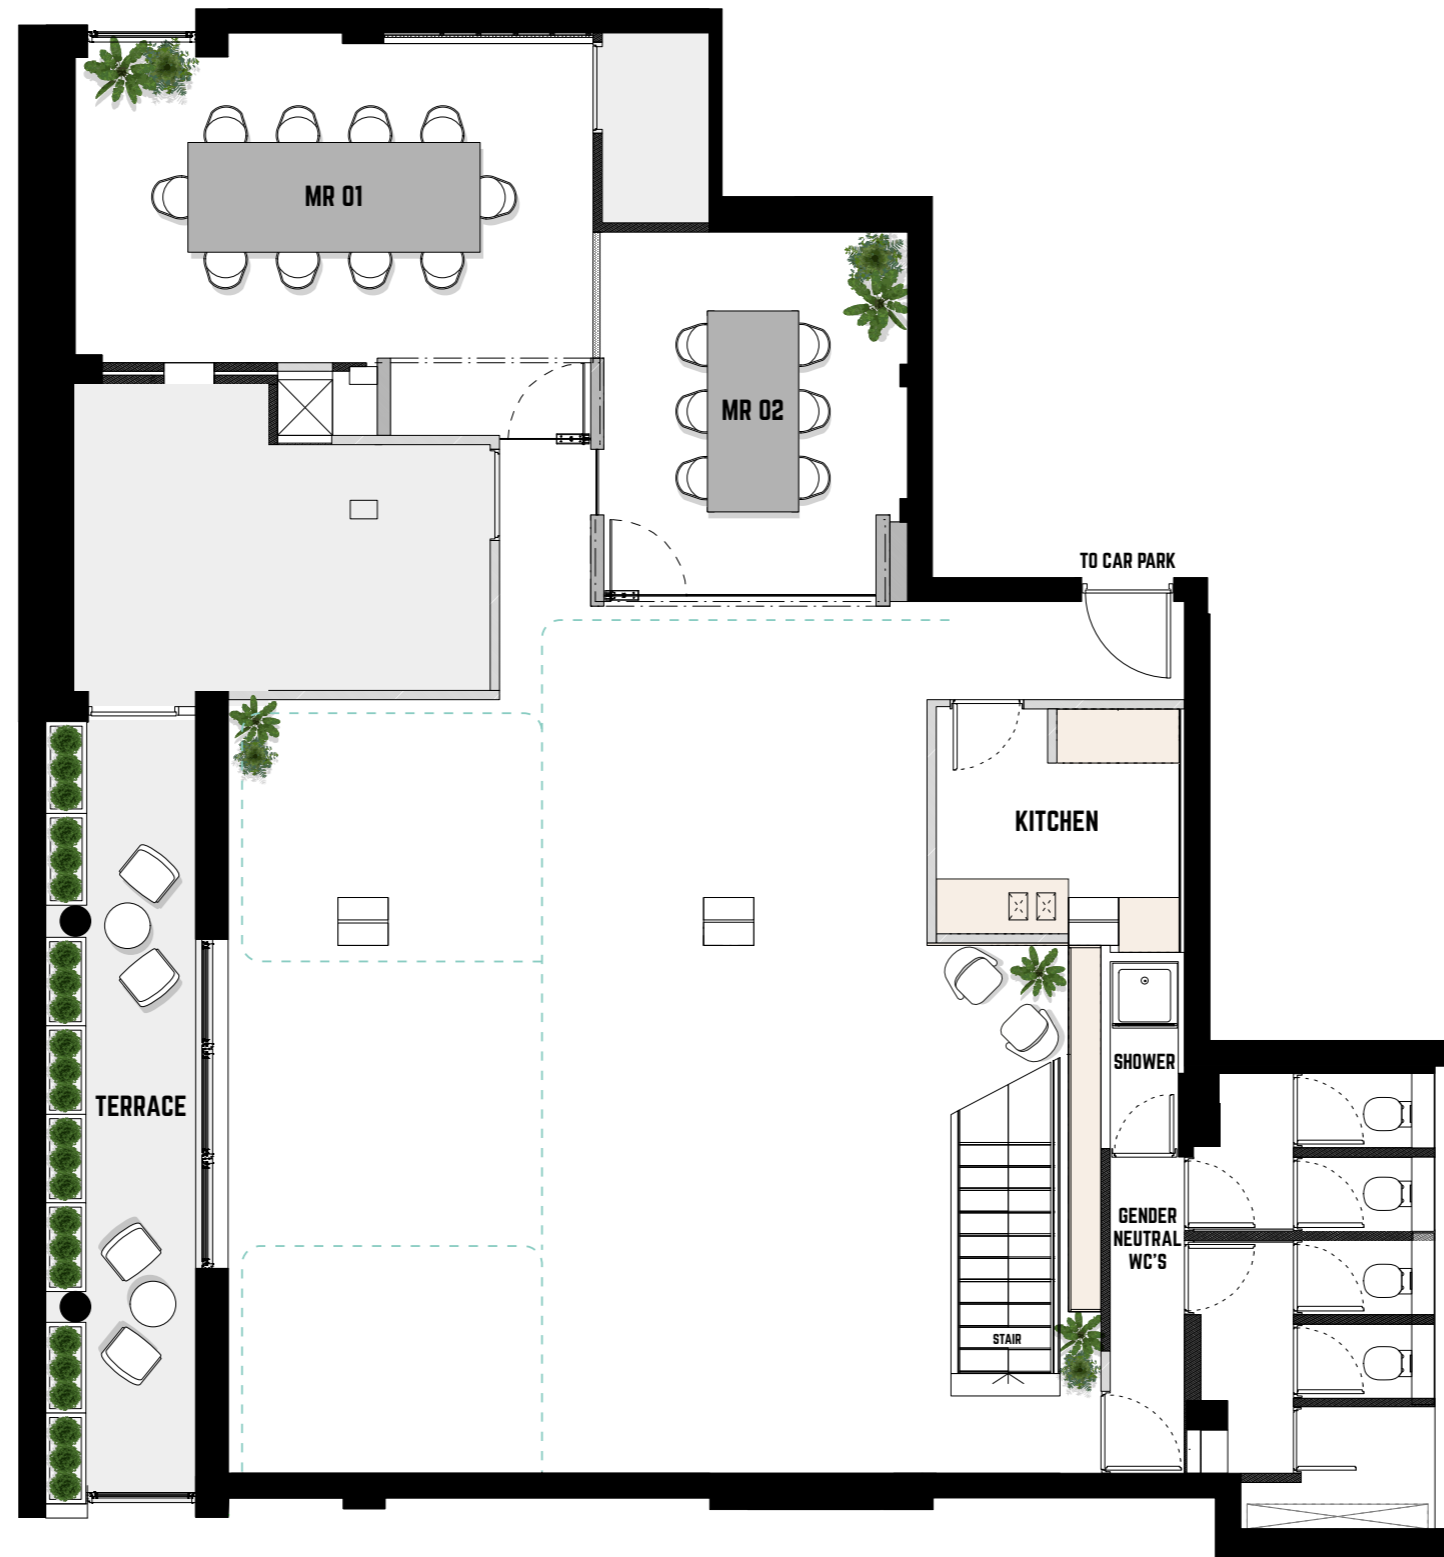

Smaller breakout areas can be simply created by using the integral floor to ceiling curtain dividers.

The large light-well above the terrace means despite being on the lower ground floor natural light floods in. The wrap around balcony provides several additional viewing points.
