(5.0 per person)

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for this increase. One of the main reasons is the increasing demand for health care services. The population of the UK is ageing, and this is leading to an increase in the number of people who are frail and need care. In addition, there is an increasing demand for health care services from people who are living longer lives. This is leading to an increase in the number of people who are employed in health care. Another reason for the increase is the increasing demand for health care services from people who are living longer lives. This is leading to an increase in the number of people who are employed in health care.
