SAPLING VODKA
HYPER MELON
WHITE CHOCOLATE
ORANGE VERMOUTH
TAITTINGER CHAMPAGNE

We take the surplus chocolate from our white chocolate & citrus dessert at Frog (you can taste that too, it's on Eve's food menu) and distil it in the Lab rotovap.

Hyper melon is our secret recipe, which utilises all parts of the melon. We add Champagne to the mix because why not?

TOKI BLENDED JAPANESE WHISKY
WHOLE GRAPEFRUIT
PASSION FRUIT
LA YUZU
SAKE

Using our ultra-sonic homogeniser, we rapidly infuse passion fruit husks into Toki Whisky. The grapefruit and yuzu citrus peels offcuts enhance the flavours of the spirit. The Caribbean spices from the Rum bring a tropical finish.

Soho House has their Picante and Eve has the spicy kimchi Marg but which one's better?

We make a fermented kimchi from the kitchen's surplus vegetables, which we blend to a puree that forms the rich, tangy base for our spicy Margarita.

A must-try!

Using liquid nitrogen, we blister mint stems, at -138°C , and smash them in to lots of tiny pieces. This gives us a larger surface area from which to extract flavour. This is mixed with waste citrus stock and carbonated. Depending on how many you enjoy, you could be seeing stars...

Pineapple skins have huge amounts of flavour and what's fascinating is that the skin actually contains more anti-oxidants than the pineapple itself. We extract both flavour and anti-oxidants from the skins and infuse into our Vodka, finishing with sorrel stems for a touch more acidity and freshness .
