ウィスキー (Whisky)

History

Having long produced alcohol, principally from rice, the Japanese first discover whisky in 1853 with the arrival of American commodore Matthew Perry in Tokyo bay. At the end of the 19th Century, several Japanese companies already attempt to produce this spirit, but the first trials made from rice or corn are unsuccessful.

Whisky production in Japan began around 1870, but the first commercial production was in 1924 upon the opening of the country's first Distillery, Yamazaki. Broadly speaking the style of Japanese whisky is more similar to Scotch whisky.

NIKKA Distillery

In 1918, **Masataka Taketsuru**, son of a sake brewing family, is recruited by the Settsu Shuzo Company to produce the first authentic Japanese whisky. With a background in chemistry, the young man decides to leave for Scotland, in the aim of discovering the secrets of whisky production.

The northern island of Hokkaido is where Taketsuru in 1934 finds the ideal site for the construction of **Yoichi**, a distillery built in the purest Scottish tradition.

The **Miyagikyo** distillery is built in 1969, in the heart of the natural environment, from which the whiskies draw their softness, their elegance, and purity.

Yoichi 12 Year Old 45%

The pot stills of the Yoichi distillery are still directly heated, proffering hot spots in the stills, which in turn gives the whisky some wonderful sweet, rich notes. The nose is crisp and fresh. Gentle, weaving smoke whirls above apple peels and crisp pears. The palate is of medium-body and very crisp. There are notes of peels and cut orchard fruits, a little floral note and a subdued peat smoke. The finish is of good length with a little spicy sweetness and smoke.

Taketsuru 21 Year Old 43%

Suntory Distillery

YAMAZAKI is Japan's first and oldest distillery, established in 1923 by Suntory's founder Shinjiro Torii. Inspired by traditional Scottish whisky, Torii envisioned a Japanese approach by choosing a terrain and climate completely different to those of Scotland to create a unique kind of whisky. Yamazaki is thus the birthplace of Japanese whisky.

The **HAKUSHU** distillery is without question one of the highest in the world. The malt whiskies born here are simultaneously blessed with a very particular microclimate, luxurious forests, and water offering a rare softness and purity, only made possible by filtration of rain and snow through thousand-year-old granite rocks.

The Hakushu Single Mat, Distiller's Reserve 43% £8.50
