PLANET

Doing our bit for the Environment

As a family run venue we care about our environment and really believe in helping the planet where we can.

Planting is a great way to combat climate change and has benefits for people, wildlife and the environment. Our beautiful wild flower meadow encourages pollinators as well as providing a beautiful, natural backdrop.

We have an on-going programme to plant indigenous, native trees across our 25 acres. Every couple that book with us will be involved in our mission and become part of our history. It will help increase bio-diversity, prevent soil erosion, reduce flooding and much more.

We do our very best to implement as many eco-friendly measures as possible to lessen any impact on the local eco-systems and environment in general.

Small steps all make a big difference to ensure a better planet for future generations
